[ENTER]

EXPOS3D is a radical immersive art experience that confronts the shifting balance between humans, machines and control.

EXPOS3D explores three converging forces shaping modern life:

FAITH

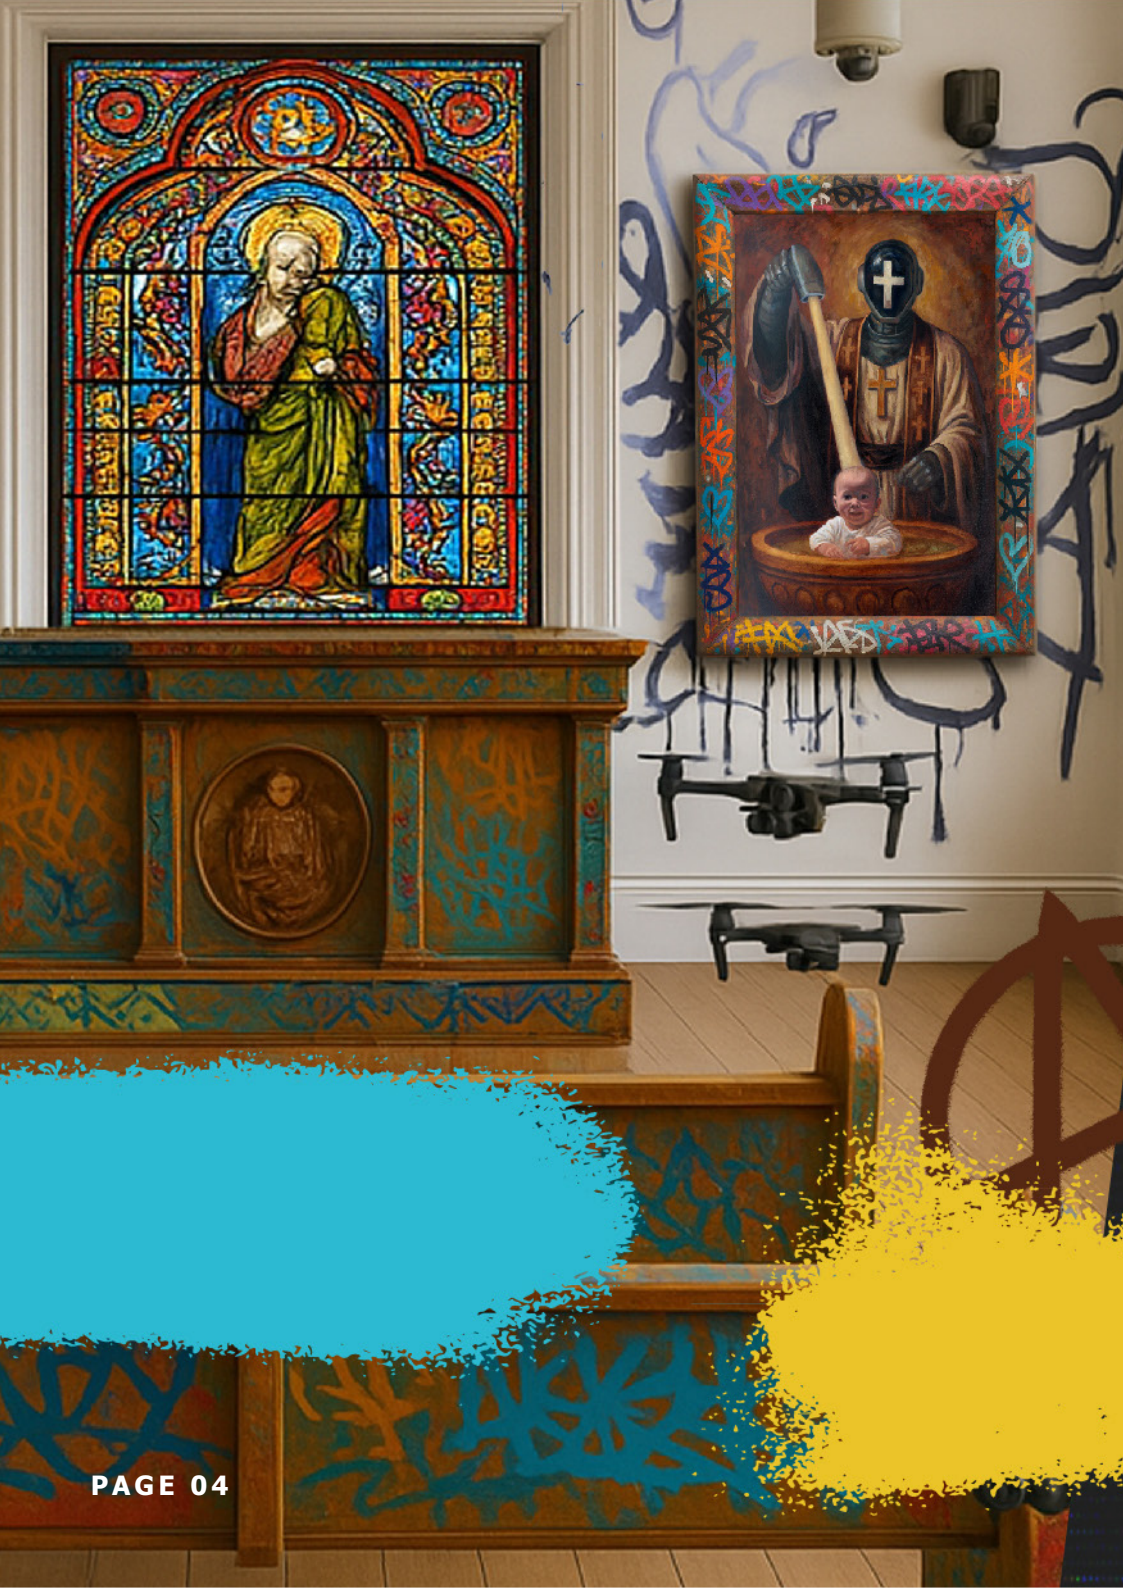

Sacred imagery, ritual, and iconography are reimagined through digital lenses. What do we worship in an age of algorithms?

SURVEILLANCE

Cameras embedded in artworks. Drones track you. AI systems watching. Who holds the power to see, record, and define us?

REBELLION

Glitches, graffiti, and hidden interactions disrupt control. How do we reclaim agency in systems built to track us?

AN EXHIBITION FOR THE AGE OF OBSERVATION

A LIVING SYSTEM

Set within the historic Custom House in Leith, the exhibition transforms the space into a living system of observation where every movement, reaction, and interaction matters.

More than an exhibition, this is the launch of a cultural revolution — and we're seeking visionary partners to help shape the full-scale EXPOS3D 2026 experience.

WHAT'S AT STAKE

THE SYSTEM HAS EVOLVED

In a society increasingly defined by data and algorithms **EXPOS3D** asks:

- What does it mean to be seen?
- Who controls the narrative?
- And what do we give away—willingly or unknowingly—by simply participating?
- This is an exhibition for a world already living the questions it poses.

WHAT WE'RE BUILDING

OUR AIM

Spark urgent conversations about surveillance and autonomy by blending traditional fine art with cutting-edge technology to expose the systems watching us.

- Create an experience that resonates with both Web2 and Web3 audiences
- Prototype and stress-test ideas for the full-scale 2026 exhibition
- Build long-term cultural value that extends beyond the gallery walls
- Invite a select group of collectors and innovators to join as founding patrons

INSIDE THE SYSTEM

WHAT MAKES EXPOS3D IMMERSIVE?

In this space, the boundaries blur between viewer and viewed. It's a responsive system that watches, listens and adapts.

- Cameras track your movements in real time
- Facial recognition activates installations
- AI system LOGOS builds a digital dossier from your presence
- Augmented reality alters what you see
- Sound and projection react dynamically as you explore
- Your actions shape a personalised narrative experience

This experience is fully GDPR-compliant. All personal data is processed locally, never stored or shared, and automatically deleted at the end of each day.

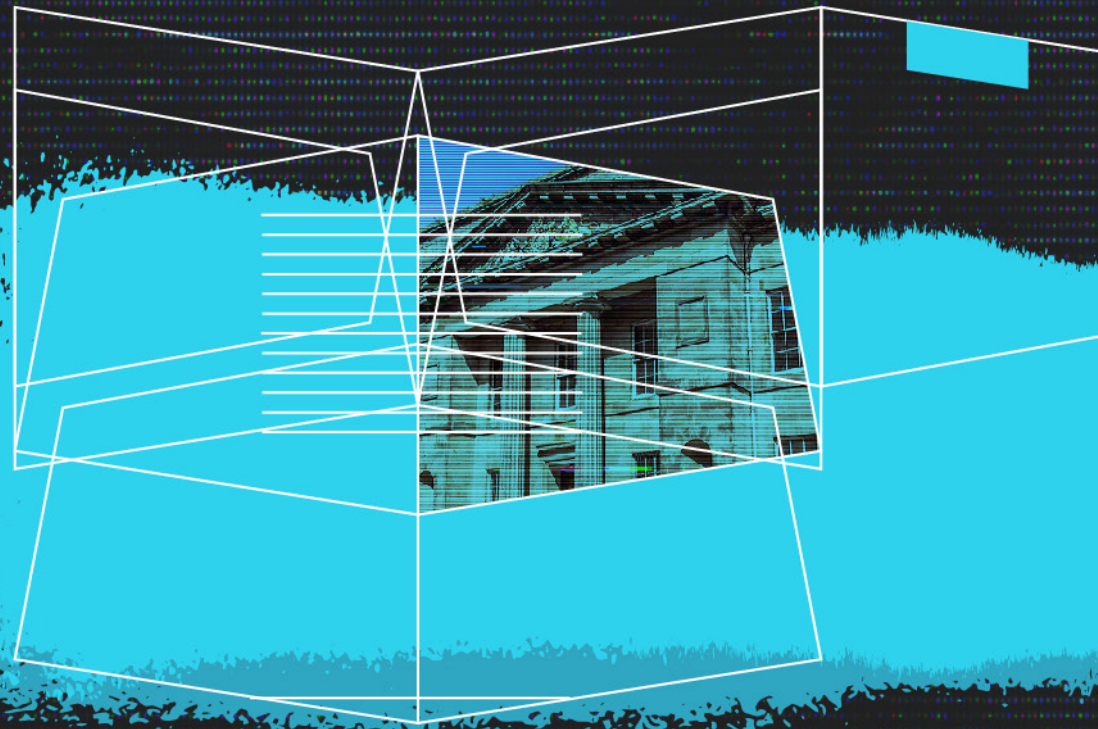

BRIDGING WORLDS

WEB2 MEETS WEB3

At its core, **EXPOS3D** is a bridge.

- For the traditional art world: a bold exhibition steeped in narrative and symbolism
- For digital natives and Web3 communities: a space to engage with NFTs, on-chain provenance, and interactive digital artefacts
- For everyone: a chance to question the systems shaping our lives
- For early patrons: A chance to acquire 1 of 1 digital and physical artworks

On-site visitors may receive optional digital collectibles, POAPs (Proof of Attendance Protocol tokens), or unlockable content.

A GALLERY BEYOND WALLS THE METAVERSE TWIN

To ensure accessibility worldwide, **EXPOS3D** will launch a metaverse replica of the exhibition:

- A full 3D digital twin of the Custom House gallery
- Open access via desktop, mobile, and VR
- Interactive elements and avatar exploration
- Hidden NFT airdrops and participation-based rewards
- **EXPOS3D** patrons will be featured in both the physical and digital twins of the exhibition earning recognition in both worlds

LEARNING THROUGH DISRUPTION

A PLATFORM FOR UNDERSTANDING

EXPOS3D is designed to entertain, educate, and challenge. Through immersive storytelling and visceral design, it offers:

- A fresh way to engage with complex ideas around data, identity, and power
- Educational opportunities for schools, universities, and the curious public
- Panels and tours for deeper engagement

FOLLOW RECORD PREDICT

Draft ten new commandments [generate from trending topics]. Design a disciple using corrupted user data. Recreate Eden with surveillance towers [include forbidden ad banners]. Add noise. Add glitch. Add drones in formation. Create a livestream for the second coming [set timezone]. What happens if salvation goes viral? Start a revolution inside the map. Create every act of disobedience. Sign in to continue. Create grace as an exploit. Render rebellion. Submit. Design a church with no walls [use screens]. Upload a sermon [voice cloned]. Create a rosary from retweets. Simulate incense [add scented fog]. Eat Watch Pray [add virtue].

Map the face of God using facial averages [blend across 8.4 billion subjects]. What happens when belief becomes content? Build a God who wants engagement. Create a sacred feed [update hourly]. Which virtues drive the most clicks? Define free will inside a UX framework. Offer salvation through swipe. Generate a burning bush using AR [trigger proximity alert].

THE ARTIST

TREVOR JONES

Trevor Jones is a globally recognised artist at the forefront of the Web3 art movement, known for fusing traditional oil painting with cutting-edge technology. His work has sold at Christie's and Sotheby's, exhibited worldwide, and earned acclaim from collectors, critics, and creatives across both physical and digital realms.

With **EXPOS3D**, Trevor continues to push boundaries, merging art, AI and immersive design.

JOIN THE RESISTANCE

AN INVITATION TO COLLABORATE

In a society increasingly defined by data and algorithms, **EXPOS3D** invites:

- Financial sponsors and aligned investors
- Creative collaborators in AR, immersive tech, and blockchain
- Institutional partners across art, education, and innovation
- Donors of equipment, space, or expertise

Help bring to life an ambitious, boundary pushing, mixed-reality experience.

WHY NOW?

BECAUSE...

- The systems are already here.
- The future of art and freedom demands participation
- People are ready for something real, immersive, and visionary

Early supporters will help shape the final form of the exhibition while gaining visibility and cultural capital.

This invitation is distinct from our Collector Tiers, with both paths helping to build the full-scale **EXPOS3D 2026**.

COLLECTOR TIERS

BE PART OF THE REVOLUTION

EXPOS3D is an uprising, and at its heart are the collectors, patrons of a new creative frontier. Each tier unlocks rare 1/1 art, insider access, and a place in the evolving narrative.

| Tier | Name | Eth Price | Allocation | Key Benefits |
|------|-----------------------|-----------|------------|--|
| 1 | THE OBSERVER | 0.1 | 333 | 1/1 NFT |
| 2 | THE WITNESS | 0.69 | 21 | 1/1 NFT · 45×30 signed 1/1 print |
| 3 | THE INITIATE | 1 | 11 | 1/1 animated NFT · 45×30 signed AR print · Named in both galleries (2025) |
| 4 | THE KEEPER | 2.5 | 7 | 1/1 animated NFT w/soundtrack · 60×40 cm signed AR print · Signed EXPOS3D 2026 book · Name in both galleries (2025/26) · VIP access (2025/26) |
| 5 | THE REVELATION | 6.9 | 3 | 60x40 cm EXPOS3D oil painting · 1/1 NFT animation inspired by painting · Signed EXPOS3D 2026 book · Name in BETA & 2026 physical/metaverse galleries · Zoom Q&A with Trevor · VIP dinner/studio visit/private tour during EXPOS3D 2026 |

[VIEW FULL TIER DETAILS](#)

ALL COLLECTORS RECEIVE

- Name in the official EXPOS3D Collector Archive
- Credit in the EXPOS3D 2026 exhibition book
- Whitelist access to the Genesis 2026 EXPOS3D mint
- Early access to an exclusive EXPOS3D 2026 behind-the-scenes video

WHY COLLECT NOW?

- Be immortalized in the official EXPOS3D Collector Archive
- Claim a rare 1/1 NFT across five exclusive tiers
- Secure whitelist access to the Genesis EXPOS3D 2026 mint
- Have your name etched into the physical gallery and Metaverse Twin
- Receive premium signed and editioned physicals
- Gain VIP access to both the 2025 BETA show and the 2026 full-scale exhibition

Join the collectors shaping the code.
